🎓 Education

Full Stack Developer, CodeBoxx, Saint Petersburg

June 2023 — October 2023

At CodeBoxx Academy, I explored MERN stack, React Native, and Ruby on Rails. The program went beyond basics, offering personalized development and leadership training. Real-world business simulations in an Agile environment prepared me for the tech sector. Now, I'm equipped with a diverse skill set and a drive to make an impact.

★ Prior Projects

Professional site for Michael McDowell Phd., MikeMcDowell.online

January 2023 — February 2023

A very simple info page I built for Professor Michael McDowell Phd.

- HTML and CSS
- Worked with Dr. McDowell on his requirements for the site

HVAC App

November 2023 — Present

In the process of developing a cross platform, React Native app for HVAC field technicians. This app will include various tools to perform their job more efficiently. Some of these tools are:

- Calculator for testing a start capacitor under load
- Duct sizing calculator
- Form for estimating complete duct system change out, with ability to export
- Subcool/Superheat Calculator

Personal Site, Stevemillertime.com

January 2024 — Present

Site I made for myself in a challenge to see what I could create in less than 2 hours, using React.js and Bootstrap.

I will be updating this site and logging the changes to track my growth as a developer!
